

ActivityManager

Clinical activity, efficiently and productively deployed.

ActivityManager is a revolutionary way to plan, manage and integrate the activity of clinicians within multi-disciplinary teams, including nurses and Allied Health Professionals. It allows organisations to intelligently deploy correctly skilled people, across physical locations in the most effective way.

Safer, more productive care

Reduce the number of cancelled activities by anticipating specific staffing supply problems, allowing timely and responsive redeployment.

Effective deployment

Assign the correctly skilled people, to the right locations, based on the planned activities.

Increase savings and reduce costs

Maximise savings with improved service planning.

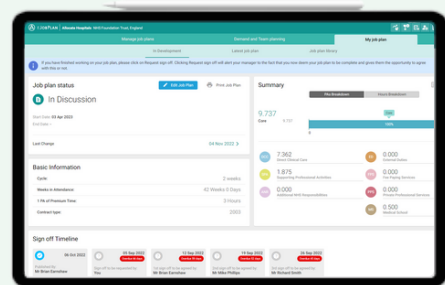

Support staff wellbeing

Provide staff with the visibility of what they are going to be doing and where, enhancing predictability and boosting wellness.

Why ActivityManager

- Increase visibility of the whole clinical team delivering activity, across multiple locations.
- Proactively identify activities which are not appropriately staffed, enabling action to be taken ahead of time.
- Gain a real-time awareness of the impact leave and absence will make to clinical activity.
- Have a clear understanding of staff who are on standby to fill in any gaps, reducing cancellations.
- Easily create Activity Profiles, which store the demand for a particular activity type.
- Integrate with MedicOnDuty and JobPlan, for a full end-to-end workforce management tool.
