Loop

Keeping you 'in the loop' with your health & care community

We know connecting and communicating in health and care is not the same as any other industry. It is fundamental to employee engagement, creating a community and patient safety. Loop is the app that allows colleagues and organisations to connect and communicate. From messaging colleagues to taking part in surveys, the platform helps to improve engagement, help staff better manage their work-life balance and ensure everyone is kept 'in the loop'.

Loop everyone into the latest news

Newsfeeds, Instant Messaging and Push Notifications mean you can get important news and messages to staff groups quickly and easily
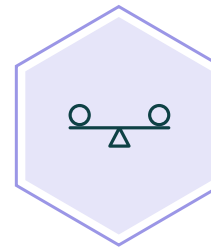

Improve engagement with staff

Targeted communications, surveys and polls allow organisations to build more personal relationships with employees and increase their engagement

Secure and auditable platform

A fully secure platform means admin has control of who is in the loop, staff don't have to give out personal details and no risk of data leaks compared to other social platforms

Better work life balance for staff

By keeping all work communications to one app, Loop stops work communications seeping into personal social channels

Loop in your work diary

View your roster. View your team roster. Book bank shifts. Loop also allows you to also connect with your work diary easily
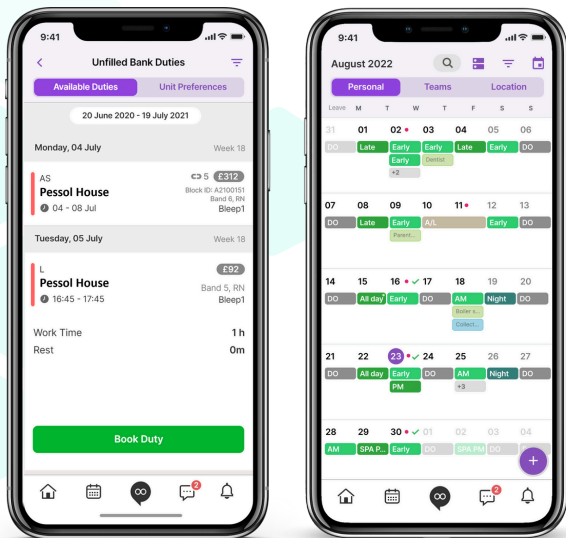

Secure Platform - Thanks to the secure platform, everyone can stay 'in the loop' without needing to share personal contact details amongst staff members.

"There is nothing better than having my rota on my phone as I know what days I'm working, happy days."
February 2024 NPS Survey
Staff Member at Marie Curie Cancer Care

## Loop is a fully integrated part of Optima.
