

Appraisal

Encouraging development, guiding practice, supporting revalidation

Appraisal offers a comprehensive and intuitive solution that enables doctors to capture the key elements of their individual practice and performance on one portal. Supplementary evidence, professional development plans and learning needs are easily uploaded. The solution creates a single, navigable document that acts as the basis for the demonstration of working to organisational objectives, fitness to practise and requirements of revalidation, whilst always remaining up-to-date.

Revalidation compliance

Ensures doctors are compliant with the requirements of revalidation, simplifying the process, removing any uncertainty, allowing doctors to be confident in the process

Enhanced transparency

Provides an overview of every step of the process for appraisees and appraisers, giving an overview of each appraisal from start to finish

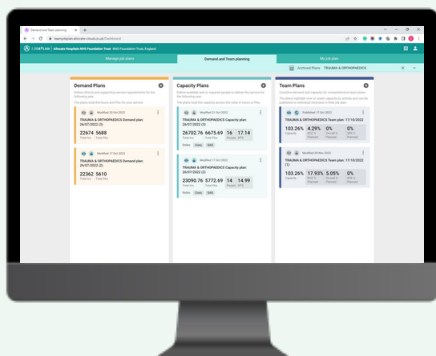

End-to-end appraisal system

Integrates with a 360-degree feedback tool to support collection and management of multi-source feedback

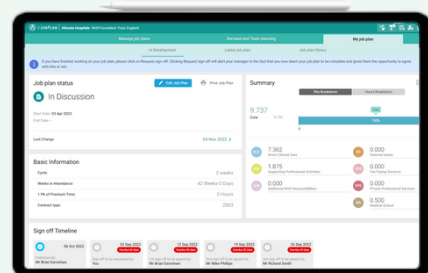

Simple appraisal management

- Keep up-to-date with flagging of the number of appraisals due, any recorded significant events, complaints or missing patient feedback.
- A Responsible Officer Dashboard provides a detailed overview of each doctor's appraisal and revalidation cycle.
- Privacy settings enable control of access levels and ensure confidential information is kept secure.

Reduced burden

- Automatic emails and notifications support deadlines and inform individuals of actions required.
- Any number of supporting documents can be uploaded, from electronic and paper sources.
- Colleague and patient feedback is automatically included in the appraisal portfolio.
- Electronic sign-off of key appraisal outputs simplifies workflows and supports sign-off and completion.
